GCSE COMBINED SCIENCE: TRILOGY

Higher Tier Chemistry Paper 1H

Friday 17 May 2024 Morning Time allowed: 1 hour 15 minutes

Materials

For this paper you must have:

- a ruler
- · a scientific calculator
- the periodic table (enclosed).

Instructions

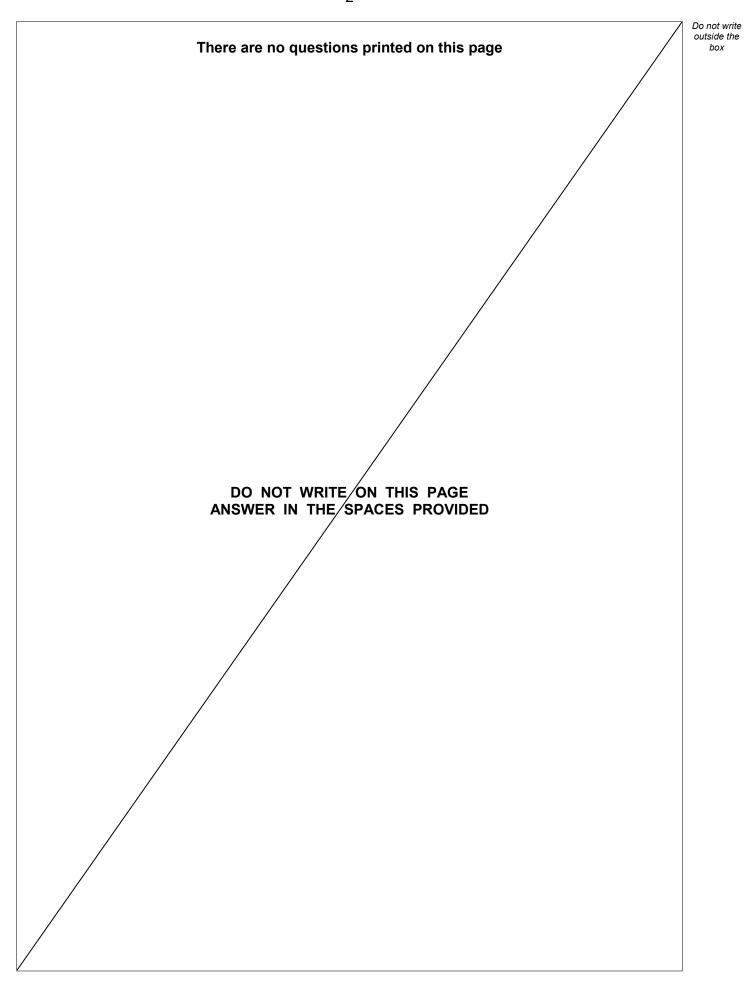

- Use black ink or black ball-point pen.
- · Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer all questions in the spaces provided.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

For Examiner's Use Question Mark 1 2 3 4 5 6 7 8 TOTAL

Information

- The maximum mark for this paper is 70.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

A student investigated the thermal decomposition of copper carbonate.

Copper carbonate decomposes to form two products.

Figure 4 shows the apparatus.

Figure 4

This is the method used.

- 1. Add 1.2 g of copper carbonate to a test tube.
- 2. Heat the test tube and contents until the mass does not change.
- 3. Record the mass of the contents of the test tube after heating.
- 4. Repeat steps 1 to 3 with different masses of copper carbonate.

Table 1 shows the results.
